

ULTRA PRO

Ultra Filtration for Continuous Treated Water at Every Tap!

**The
Final
Barrier
Microbiological
Protection!**

- Lockout capability for pretreatment of water for reverse osmosis.
- Reverse-flow cleaning cycle for increased effectiveness.
- Unique control system allows intuitive programming.
- Pilot Confirmation testing available.
- Specific testing should be done to confirm the removal and/or cleaning ability for turbidity applications.

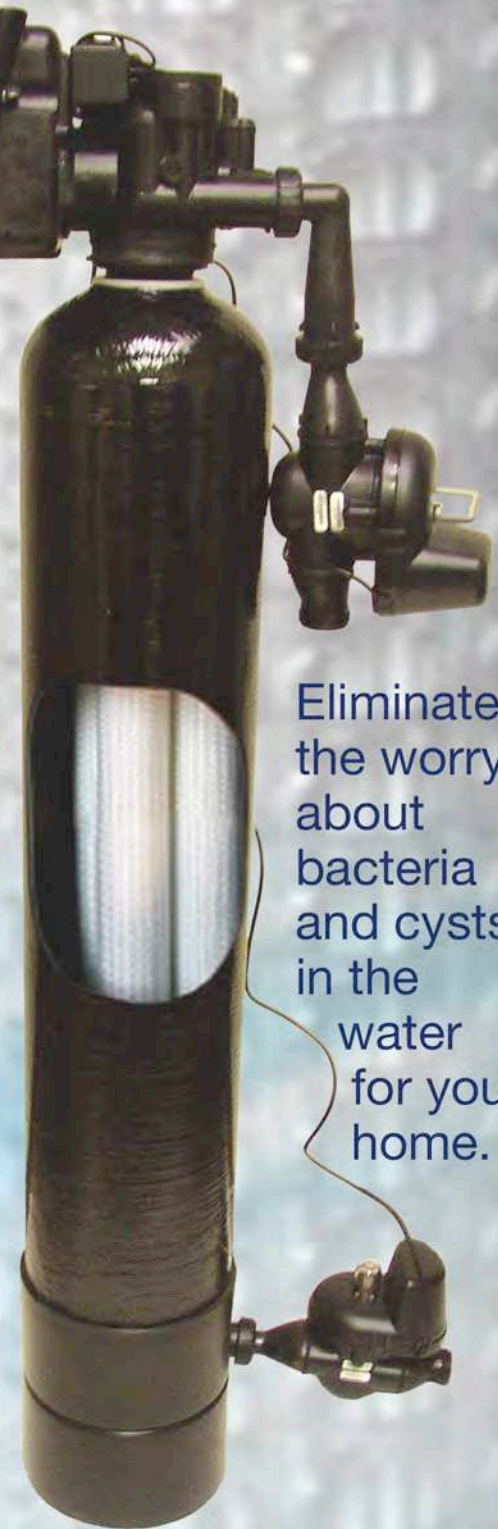

Modularized design for higher flows:

MP2-ULTRA.....	20 GPM @15psi dP
MP3-ULTRA.....	30 GPM @15psi dP
MP4-ULTRA.....	40 GPM @15psi dP

Medium options for various applications:

MEDIUM.....	FILTRATION LEVEL
Carbon Filter.....	40.00 microns
Filter Ag.....	20.00 microns
Multimedia.....	10.00 microns
Cartridge Filter.....	5.00 microns
Bacteria Filter.....	0.20 microns
Endotoxin Filter.....	0.05 microns
ULTRAPRO.....	0.02 microns

Get Peace of Mind with ULTRA PRO!

Eliminate the worry about bacteria and cysts in the water for your home.

These membrane filters conform to NSF/ANSI 53 and 61. Additional testing by independent laboratory resulted in a 6.0 log reduction in bacteria.

Clearer, Safer Water at Every Faucet!

ULTRA PRO

**Clearer,
Safer Water!**

Your peace of mind depends on getting the best quality and safety you can get for every aspect of your life. **Nothing is more vital to life than water.**

You can rely on the UltraPro by Master Water Conditioning to remove bacteria, cysts (and much more) to provide you with **worry-free water!**

- Each unit has 5 1/2 miles of hollow fiber membranes for superb filtration which protects your water.

- Low waste water discharge used when cleaning.

What it does...

Provides Safer Water... The membrane filters are certified to NSF/ANSI 53 and 61.

- Tested for 4 log **cyst reduction.**
- Independent third party laboratory tested for 6 log **bacteria reduction.**

Continuous treated water at every tap!

Provides Clearer Water... Filters water to a rated 0.02 absolute filtration, based on application.

Handles natural organics/turbidity.

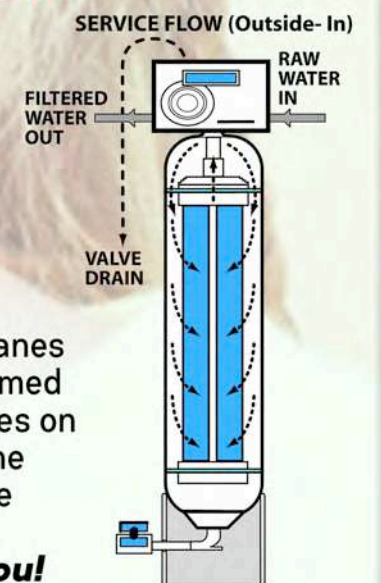

- Colloidal clay (gray water and/or mica white water).
- Tannin (dark yellow water, iced tea-colored water).
- Organic iron (pink water).

How it does it...

Water comes into the unit, is forced through the membrane fiber strands that remove contaminants and send clear, clean water into your home.

Flushing of the membranes occurs at pre-programmed time settings. No worries on how or when to flush the system -- all units come with Auto Flush...

It cleans itself for you!
